

## DJUCED® DJ software announces version 5.2 update, including streaming integration with SoundCloud Go+

Rennes, July 20, 2021

After integrating Qobuz in 2016, and Beatport LINK/Beatsource LINK in April 2020, it is with great pride that DJUCED today announced the launch of mixing software version 5.2, which includes a music streaming integration with next generation entertainment company, SoundCloud's, premium listener subscription, SoundCloud Go+. DJUCED, which will soon be celebrating its 10th anniversary, continues to enrich its functions with the latest software version. Here's what's new:

### DJUCED 5.2 - SoundCloud GO+ integration

With the ambition to support all DJs from beginners to the most experienced, DJUCED 5.2 offers SoundCloud users the ability to instantly stream and mix SoundCloud's massive catalog of more than 250 million tracks from over 30 million creators using a SoundCloud Go+ premium consumer subscription. The integration features the use of DJUCED's Intelligent Musical Assistant (IMA), which provides suggestions on the most suitable song to help DJs compose ever more creative and harmonious mixes, even when the DJ wants to mix very different musical genres. In addition, as part of the integration, SoundCloud is launching four **free playlists exclusively available through the DJUCED software**, making it even easier to begin mixing sets.

### DJUCED 5.2 - Louder, clearer sound

The DJUCED teams have completely reworked their audio engine to offer professionally calibrated audio volume. DJUCED thus offers a naturally louder sound which can lead to more saturation, which is why the teams have also updated the Vu-meters. They are now completely red when the volume is saturated but keeping the Gain button in the green and orange zones will offer the clearest sound reproduction for the audience.

### DJUCED 5.2 – Better visibility

Always attentive to their loyal users' feedback, the DJUCED teams have adapted the font used in their browser for better visibility, including an Emoji display for a more personal way to communicate!

### DJUCED 5.2 – A lot of improvements

DJs using DJUCED can now reset the status of a track already played, sort their library by multiple criteria, display the BPM in the same way as a CD media player and edit their Loop In / Loop Out sizes.

All the details and the free 5.2 version of DJUCED are available on [Djuiced.com](http://Djuiced.com).

**About Guillemot Corporation S.A.**
